

Internship offer

Nanores is now recruiting students for internship in our laboratory. Please send us your offer until **16.12.2018**. Please attach your cover letter and curriculum vitae in English. The internship will begin in **January 2019**.

Scope of the internship:

- basic training covering usage of research equipment (SEM/FIB systems, AFM),
- sample preparation training,
- introduction to practical nanotechnology laboratory standards,
- simple research tasks performed with Nanores devices,
- reporting and presenting results after completion of assigned tasks.

Requirements:

- creativity, readiness for learning and problem solving
- interest in technological issues,
- scientific equipment and R&D work experience (optional),
- very good command of spoken and written English.

Duration:

2 months (with possible extension)

Place :

ul. Bierutowska 57-59, Wrocław, Wrocław Bussines Park, building 17

We offer:

- paid internship,
- flexible working hours,
- self-development in unique technological start-up company,
- possibility of employment after completing the internship (for selected candidates).

If you are interested, please send the application to:

rekrutacja@nanores.pl

We will respond only to selected candidates.
